Works in Progress Leads Today’s High-Signal Founder Picks

By Recommended Reading from Tech Founders • March 28, 2026

Today’s clearly organic recommendations are sparse but useful: Patrick Collison strongly endorses Works in Progress with a direct subscription link, while Marc Andreessen points readers to a thread on the 2015-2022 history of internet platform moderation.

Most compelling recommendation

Only clearly organic, non-self-promotional recommendations are included below.

Patrick Collison’s *Works in Progress* pick is the strongest recommendation in today’s set because it combines a direct endorsement with an exact, immediately usable link [1].

- **Title:** *Works in Progress* [1]
- **Content type:** Publication subscription [1]
- **Author/creator:** *Works in Progress* [1]
- **Link/URL:** <https://worksinprogress.co/print/> [1]
- **Who recommended it:** Patrick Collison [1]
- **Key takeaway:** Collison says it “continues to get better with each issue” and explicitly recommends subscribing [1].
- **Why it matters:** The upcoming issue is described as covering ASML, new Hindu megatemples, egg freezing, and Australia’s small boat crossings policy, which gives readers a concrete sense of the publication’s range [2].

“Works in Progress continues to get better with each issue. Highly recommend a subscription” [1]

Also notable

- **Title:** *Master thread on the 2015-2022 closure of the Internet* [3]
 - **Content type:** X thread [3, 4]
 - **Author/creator:** @arctotherium42 [4]
 - **Link/URL:** <https://x.com/arctotherium42/status/2037324942069342679> [4]
 - **Who recommended it:** Marc Andreessen [4]
 - **Key takeaway:** Andreessen signals that the thread is something readers should not forget; the thread describes 2015-2022 as a period when major internet platforms moved from broad openness to stricter narrative enforcement, often with governments and NGOs involved in moderation [4, 3].
 - **Why it matters:** It gives readers the exact thread Andreessen is elevating as historically important, along with a strong signal that he thinks it is worth revisiting [4].
